

Timberlawn Southern Region Partial Hospitalization Program

Timberlawn Mental Health System is pleased to announce the opening of the new Timberlawn Southern Region Partial Hospitalization Program for adolescents!

The Southern Region Partial Hospital Program is Timberlawns' first day treatment program in the Southern Region of Dallas for children and adolescents with behavioral and emotional issues. It operates year-round and addresses the needs of 12 to 17 year-olds who struggle emotionally and behaviorally, and who have difficulty maintaining appropriate behavior in a traditional school setting.

The program operates Monday through Friday from 8:00 am to 3:00 pm. Each child attends school, with peers, from 9:45 a.m. until noon, Monday through Friday, on a year-round schedule. A state-certified teacher staffs each of the age groups in a special classroom area.

The program is staffed by Licensed Clinicians, a state certified teacher, mental health techs and **Dr. Fernando Siles, Child and Adolescent Psychiatrist.**
